**Signal Pop reflective thread**

Retro-reflective sewing & embroidery thread for Apparel  
3D reflective stitching effect

**Coats Signal Pop thread** is a retro-reflective sewing and embroidery thread for fashion applications in apparel sewing. When illuminated by a light source, it helps to enhance the visibility at night-time or in difficult weather conditions and adds that extra special decorative feature.

Coats Signal thread combines the tenacity of a polyester filament cover with a retro-reflective core to provide excellent strength, durability and good sewability.

### Uses

- Decorative use as top cover thread in flatseam ISO 602 / 605 / 607
- Needle or bobbin thread in decorative, non-construction lockstitch seams
- Embroidery embellishment

Signal Pop thread is available in four base colours. The reflected light is always white.

Coats threads are manufactured and quality controlled to the highest standards possible. Since the conditions of use, washing, pressing and cleaning etc. vary, the purchaser should assure themselves by preliminary tests that the dye fastness of the yarn or thread is 100% colourfast to crocking or washing under all conditions. We cannot be responsible for any consequential damages howsoever caused since the value of the thread is so disproportionate to the value of the goods into which it is stitched.
