

Coats® Secura™

Coats Secura is a fusible polyester / polyester corespun, self-locking thread offering an enhanced button security in the garments. The thread is impregnated with a fusible compound, which creates a fusible fibre matrix upon thermal activation by steam or normal iron, and offers increased cohesion and enhanced button security. Coats Secura exhibits excellent button pull through strength, excellent sewability, and good abrasion resistance that seals loose ends.

Due to special coating on the thread, the surface of the dyed thread exhibits variegated appearance. Such finish and appearance actually facilitates excellent fusing characteristics.--

Since conditions and applications vary considerably in the use of a product, the customer and/or user should assure themselves that the product meets end customer requirements and is suitable for the intended end use.
